**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/533,269	<b>Applicant(s)</b> TANK ET AL.	
	<b>Examiner</b> Kenneth Thompson	<b>Art Unit</b> 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Jensen, U.S. 6,258,139.

Jensen discloses a tungsten carbide substrate (201; col. 5, lines 33-39) having a ring defining a recess (206) and a shelf (at 205) about the periphery of the substrate. Jensen discloses abrasive material (204, 203) in the recess providing a primary cutting edge (col. 6, lines 7-15) and a separate protective diamond layer (202, 207) suitable for a first substance (col. 5).

### ***Response to Arguments***

Applicant's arguments filed 10 July 2008 have been fully considered but they are not persuasive.

Applicants argue the diamond core of the prior art of Jensen does not provide the primary cutting edge for the tool insert.

The claim does not require the "primary cutting edge" to be located on the distal end of the substrate nor initially contacting any work material. The prior art diamond

core is located on a portion of the top surface of the substrate and protected by the diamond layer.

Applicants argue the diamond layer cannot correspond to the claimed shelf because it is diamond.

The diamond layer is located at the shelf and is of “another suitable material dependent on the first substance to be drilled”.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
